# AGEING OF THE SKIN

The skin starts showing the first signs of ageing from the age of 25. Skin becomes thinner, blood circulation deteriorates and the natural production of collagen and elastin starts to slow down, causing the skin to lose its firmness and elasticity. This natural ageing process starts from the inside out, but is accelerated by external factors like excess UV light, tobacco, alcohol, air conditioning, stress and pollution.

## THE LATEST INNOVATION IN THE BEAUTY INDUSTRY

Research has shown that the vast majority of consumers are reluctant to undergo radical medical treatments. However, they would like more profound, proven results on a natural basis. Dermatude Meta Therapy is a safe, 100% natural beauty treatment for skin rejuvenation and skin improvement from the inside out.
